Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This action is in response to applicant's amendment received on 02/14/07.
2. The finality of the previous Office action has been withdrawn. Applicant's Amendment After Final filed on 2/14/07 has been entered.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ess (4,392,401) in view of Schulze et al. (5,701,791).

Ess discloses the invention substantially as claimed including a horizontal table 12, at least one movable device 15, a feed direction (see Fig. 4), a direction opposite to the feed direction (see Fig. 6) a sawing device 10, a plurality of pickup elements 17. Ess doesn't show first drive means and second drive means. However, Schulze et al. teaches the use of first drive means 16 and second drive means 27 (see col. 6, lines 64-67) for the purpose of allowing accelerated processing of the workpiece. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device of Ess by providing the first drive means and second drive means as taught by Schulze et al. in order to obtain a device that allows accelerated processing of the workpiece. Regarding claim 6, the

Art Unit: 3724

pickup elements 43 of Schulze et al. are movable up and down in a vertical direction by clamping piston 40.

Response to Arguments

5. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Omar Flores-Sánchez whose telephone number is 571-272-4507. The examiner can normally be reached on 8:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Boyer Ashley can be reached on 571-272-4502. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
